

Content Management Software

It's as EASY as ... Point, Click, Drag and then Drop.

If you have ever made a PowerPoint presentation, then you are already a pro at creating content with Digiscreens (CMS) content management software. You simply select the widget of your choice and drop it in the area that you want it to play. You can then resize, adjust settings, add media or text and with the click of a button your content will be live on the screen

Scrolling ticker

Add custom moving announcements, sales, news and more

Text

Customises with font style, size, colour, bold, underline, italic and more

Weather & Clock

Choose your location for live weather and forecasts

PowerPoint & PDF Files

You can upload your Microsoft PowerPoint or PDF files to be directly converted into images for your display

Shapes

Create the perfect shape, arrow, or line with optional colour and border

Advanced Schedules & Day Parting

Pre-set your playlists to automatically display on the screen, on specific dates, times and specific recurring days. Schedule your breakfast, lunch, dinner and other menu specials to auto-update on defined times and/or dates.

RSS Feed

CNN, NZ Herald, Reuters, BBC, Sports, local news, health facts, weather alerts and more!

Web Page & Web Image

Add Google presentation, spreadsheet, your website, or any other URL to the screen. Add any image from the web via its URL to your content

Polls

Drive engagement while gaining insight with live polls

YouTube

Add any video, your organisation's channel, or a specific playlist

Slideshow

Create mixed media presentations: images, videos, slides, text and more

Social Media Feeds

Add any gallery with option to include description and time or stream any feed or a choose a specific #hashtag to stream
