

## **CARE OF YOUR APOLLO OUTDOOR ENCLOSURE**

To properly clean the glass, we recommend the use of a soft cotton or microfiber cloth. **DO NOT USE** paper towel, tissues or rags as it may damage the coating on the glass and leave lines behind.

For cleaning the glass, we recommend a standard 70/30 isopropyl alcohol mix (same as you purchase at any drug store). Spray the alcohol mixture on a clean soft cloth and gently clean the glass. Note:

Do NOT use Windex or any ammonia-based glass cleaner as it may damage the special coating on the glass and leave streaks. The enclosure housing can be cleaned with a soft soapy cloth and warm water to wipe dirt, dust, bird droppings, etc. Rinse cloth frequently to avoid scratching the powder coated aluminum from dirt grit.

DO NOT use the same cloth to clean the glass. For snow or ice, use a soft brush to remove snow and ice. Do not use any sharp object to loosen ice. We always recommend the purchase of a custom fit dust cover (optional accessory) to protect the beauty of your enclosure for years to come.
