Content Management Software

It is as EASY as ... Point, Click, Drag and Drop

If you have ever made a PowerPoint presentation, then you are already a pro at creating and managing content with Digi Screens digital signage content software.

Essential Widgets: you could not make anything without these

Scrolling Ticker	**Text**	**Weather & Clock**	**Shapes**
Add custom moving announcements, sales, news and more	Customise with font style, size, colour, bold, underline, italic and more	Choose your location for live weather and forecasts	Create the perfect shape, arrow, or line with optional colour and border

Media Widgets: high definition and engaging, they will bring your digital signage content software to life

Images	**Videos**	**FTP**	**Social Media Feeds**
Easily edit, adjust and resize any image, logo or background	Attract, engage, and inform with clips, commercials, or any other video	Pull media directly from any FTP and add it to your playlist	Add your social media feed to your playlist

Fun Widgets: engaging and interactive

RFID	**Countdown**	**Queue**	**Touch**
Identify objects using barcodes or tags to project information onto screens	Real-time timer clock for sales, events, holidays and more	This is where line management meets digital signage	No extra software cost, create a full touch screen. Note: with touch poing

Live Widgets: real-time and live, widgets stream from the web

RSS Feed

NZ Herald, local news, health facts, weather, alerts and more

Web page/image

Add Google presentation, spreadsheet, your website, or any other URL to the screen.

Slideshow

Create mixed media presentations: images, videos, slides, text and more

You Tube
